GitHub | LinkedIn | Portfolio

Professional Summary

Computer Science graduate and AI Engineer with experience in backend development, application integration, and workflow automation. Skilled in Python, FastAPI, REST APIs, Docker, Kubernetes, RAG pipelines, and vector databases. Experienced in debugging application failures, implementing error handling, monitoring service performance, and integrating APIs. Interested in enterprise infrastructure, cloud computing, and digital workplace technologies.

Professional Experience

TaskWin

Junior Software Developer | TaskWin India Private Limited *Oct 2026 – Present*

Freelance AI Engineer | Taskwin GmbH *Apr 2026 – Oct 2026*

- Develop backend services using Python and FastAPI, implementing API validation, retries, and exception handling.
- Build RAG pipelines using document chunking, embeddings, and vector search for internal document retrieval.
- Implement tool-calling workflows and integrate REST APIs with backend services.
- Debug application failures and monitor latency, token usage, and workflow execution.
- Coordinate frontend and backend development and troubleshoot integration issues.

Technical Skills

Programming:	Python, SQL, JavaScript, Java, C++
Generative AI:	LLMs, Prompt Engineering, RAG, Embeddings, Vector Search, Tool Calling, Structured Outputs, LoRA, QLoRA
ML/DL:	TensorFlow, Scikit-learn, CNN, VGG16, NLP, Named Entity Recognition
Backend & Databases:	FastAPI, REST APIs, MongoDB, MySQL, Supabase, Milvus
Cloud & DevOps:	Docker, Kubernetes, Git, GitHub, Postman
Automation & Testing:	Selenium, API Testing, Workflow Automation, Troubleshooting, Error Handling

Selected Projects

Prompt-to-UI Generator GitHub

Python, FastAPI, React.js, Tailwind CSS, OpenAI API

- Developed a system that converts text prompts into React components with live previews and streaming responses.
- Integrated FastAPI with React and implemented syntax validation, error handling, and iterative editing.
- Added component-level validation and preview rendering for generated interfaces.

AI Resume Analyzer & Job Matcher GitHub

Python, FastAPI, spaCy, Selenium, MongoDB, NLP

- Developed resume parsing and job-matching workflows; scraped and ranked 1,000+ LinkedIn job listings by skills and role relevance.
- Used NLP techniques to extract skills, identify job requirements, and calculate candidate-job relevance.
- Integrated Selenium and MongoDB for automated job collection and structured data storage.

FutureTrackAI GitHub

Python, FastAPI, MongoDB, React.js, OpenAI API

- Developed a career guidance platform with 12 FastAPI endpoints and structured JSON responses.
- Integrated OpenAI API, MongoDB, and REST APIs to process user information and generate career recommendations.
- Implemented JSON-schema validation, retry handling, and backend response processing.

Education

SRM University–AP *2022 – 2026*

B.Tech, Computer Science and Engineering CGPA: 8.1/10

Coursework: Operating Systems, Computer Networks, Machine Learning, Deep Learning, Probability and Statistics

ARKA Junior College *2020 – 2022*

Intermediate, MPC 91%

Certifications

Claude Code in Action – Anthropic | MongoDB Associate Developer
