JAYA HAREESWAR REDDY GUDISA

Software Engineering | Infrastructure | LLM Applications

jayahareeswar2004@gmail.com | +91 6303673727 | Guntur, India

GitHub | LinkedIn | Portfolio

Professional Summary

Computer Science graduate and AI Engineer with experience in backend development, application integration, and workflow automation. Skilled in Python, FastAPI, REST APIs, Docker, Kubernetes, RAG pipelines, and vector databases. Experienced in debugging application failures, implementing error handling, monitoring service performance, and integrating APIs. Interested in enterprise infrastructure, cloud computing, and digital workplace technologies.

Professional Experience

TaskWin

Junior Software Developer | TaskWin India Private Limited *Oct 2026 – Present*

Freelance AI Engineer | Taskwin GmbH *Apr 2026 – Oct 2026*

- Develop backend services using Python and FastAPI, implementing API validation, retries, and exception handling.
- Build RAG pipelines using document chunking, embeddings, and vector search for internal document retrieval.
- Implement tool-calling workflows and integrate REST APIs with backend services.
- Debug application failures and monitor latency, token usage, and workflow execution.
- Coordinate frontend and backend development and troubleshoot integration issues.

Technical Skills

Programming:	Python, SQL, JavaScript, Java, C++
AI/ML:	LLMs, RAG, Embeddings, Vector Search, Tool Calling, Structured Outputs, TensorFlow, Scikit-learn
Backend & Data:	FastAPI, REST APIs, MongoDB, MySQL, Vector Databases
Data Engineering:	Kafka, Change Data Capture (CDC), Apache Airflow DAGs
Infrastructure:	Docker, Kubernetes, Git, GitHub, Postman

Selected Projects

Prompt-to-UI Generator Live | GitHub

React 18, TypeScript, Vite, Tailwind CSS, Node.js, Express

- **Problem:** UI generation can produce inconsistent or invalid output.
- **Solution:** Built a deterministic planner–validator–generator using an audited component library, with explanations, live previews, and version rollback.
- **Impact:** Same prompt produces repeatable screens; the client-side pipeline needs no LLM calls or API keys.

RAG Eval Live | GitHub

Python, FastAPI, NumPy, RAG Evaluation

- **Problem:** Retrieval quality needs measurement against labelled data, not intuition.
- **Solution:** Benchmarked 27 configurations across 875 Python standard-library modules using labelled questions, Recall@k, MRR, and nDCG; implemented four chunking strategies and three retrieval modes.
- **Impact:** Deployed a FastAPI app for document search, grounded Q&A, evaluation, and uploads.

FutureTrackAI Live | GitHub

Python, FastAPI, React, MongoDB, Groq/OpenAI APIs

- **Problem:** Career seekers need relevant skill-to-role matches and actionable learning guidance.
- **Solution:** Built 14 FastAPI endpoints scoring skills against 24 career paths, with configurable Groq/OpenAI generation, schema validation, retries, and deterministic fallbacks.
- **Impact:** Returns structured matches and learning roadmaps; 43 API tests run without MongoDB or an API key.

Education

SRM University–AP *2022 – 2026*

B.Tech, Computer Science and Engineering CGPA: 8.1/10

Coursework: Operating Systems, Computer Networks, Machine Learning, Deep Learning, Probability and Statistics

ARKA Junior College *2020 – 2022*

Intermediate, MPC 91%

Certifications

Claude Code in Action – Anthropic | MongoDB Associate Developer | freeCodeCamp – Machine Learning with Python
